

LeAgent

Client Onboarding Journey

From Registration to Growth Engine Activated
v1.0 · 2026 · leagent.io

STEP 01

Business Growth Assessment

Complete a short registration at leagent.io. This allows LeAgent to evaluate your business and determine whether it is a strong fit for the platform.

STEP 02

Lead Review & Approval

The LeAgent team reviews the AI-generated business analysis and approves your onboarding. You will receive a payment link by email within 24 hours.

STEP 03

Payment

You receive a secure payment link by email and complete the €349/month subscription via PayPal. No contracts. Cancel any time.

STEP 04

Account Creation

After successful payment, your account is created automatically and a Welcome Email is sent instantly with your secure setup link.

STEP 05

Password Setup

Using the secure link in your Welcome Email, you create your account password and access your LeAgent Dashboard for the first time.

STEP 06

Business Onboarding

You provide the foundation for your Growth Engine. All fields are optional. LeAgent provides professional recommendations whenever you are unsure. You always have the final decision.

- Company logo and brand colors
- Website and social media accounts
- Business information and content preferences
- Publishing schedule and timezone

STEP 07

Brand Intelligence Setup

Inside your Dashboard, you complete a guided AI conversation. LeAgent develops a deep understanding of your business — your services, customers, positioning, communication style, and goals. This becomes your Business Knowledge Base — the foundation that guides every decision the Growth Engine makes. It can be updated at any time.

STEP 08

Platform Configuration

The LeAgent team completes the technical configuration — publishing infrastructure, content generation pipeline, automation workflows, and all platform components required for continuous operation.

✓ GROWTH ENGINE ACTIVATED

From this point, LeAgent continuously:

- Creates content guided by your Business Knowledge Base
- Produces videos, avatar videos, and graphics
- Publishes across Instagram, Facebook, TikTok, LinkedIn, and YouTube
- Monitors performance and generates 15-day reports
- Optimizes based on real results

No additional daily work is required from you.

Total time from registration to Growth Engine Activated: Typically 2–5 business days.
